mymail franking machine

SAVES TIME, EFFORT AND SPACE

Adieu postage stamp! No more waiting in queues at the post office. mymail, the small digital franking machine, is the ideal entry-level model for your office. mymail combines attractive design with intelligent features to enable your office to frank letters like a pro. Whenever you want – because you'll never run out of postage!

MORE PRACTICAL SPACE

Why do you need a franking machine, when you can use stamps? Why do you need an espresso maker, a laptop, a cell phone …

Simple:
All these things make your day easier, and better.

my**mail** makes franking letters as easy as a phone call. Clear display screen, easy operation.

my**mail** requires no additional devices; a letter scale (optional*) is integrated right into the franker. Space-saving and practical.

DOES MORE WITH YOUR MAIL

my**mail** puts your corporate image and design on every letter. At the press of a button, add your logo or an advertisement next to the postage impression.

You won't find cheaper advertising!

* Accessory available at extra charge

Optional: integrated scale

A space-saving integrated 2-kg scale* enables you to determine the exact weight of every letter and package.

mymail puts your message on the envelope

An important message for my customer – right on the envelope? my**mail** makes it possible. Compose text with the keyboard, just like an SMS, and print. That's it. A clever way to make your mail stand out.

Open 24/7

You can reload postage by modem or via PC/Internet (optional) at any time – every day, all day long.

NEW: Interface to the PC

Connect the my**mail** easily to your PC. To load faster over the Internet postage (mail**credit**) or include the software update.

Feed the envelope and off you go

my**mail** is child's play to operate. Just turn it on, select the desired mail product and feed the envelope. Voila!
An inkjet printer quickly and cleanly delivers the postage imprint.

The chip card for total convenience

A chip card makes my**mail** totally flexible. Use chip cards for loading new meter ads and accessing the machine
