

MAILCENTER

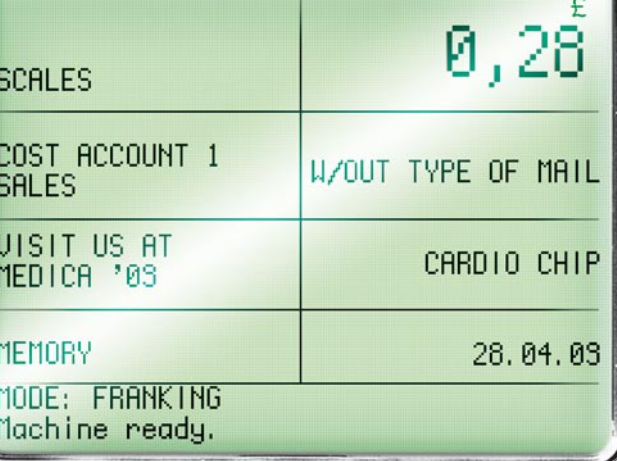

Professional franking – pulls out all the stops.

ultimail 60 + 120 franking machines

YOUR MAIL IS OUR BUSINESS

AT A GLANCE – EVERYTHING YOU NEED TO KNOW

YOUR WINDOW TO AN ENTIRELY NEW WORLD OF MAIL FRANKING ...

with the extra-large display screen of the all-new **ultimail 60 + 120**.

Discover the pioneering Francotyp-Postalia concept for franking your mail, with the superior ease of operation and outstanding flexibility offered by the brand-new **ultimail**.

ultimail delivers all the advantages of an electronic franking system in a compact and practical package. The uniquely simple program enables you to easily navigate the various options and registers. A back-lit screen displays complete information about every franking operation – at the touch of a button.

From the calculated postage amount, to an accurate image of the selected advertising slogan, to the status of currently available postage: All information is clearly presented and easy to interpret. Leave nothing to guesswork. The integrated modem enables you to load new postage at any time, day or night. Never again join the post office queue to load new postage.

Welcome to a new world of franking, from FP.

ONE CONCEPT FOR ALL YOUR FRANKING NEEDS

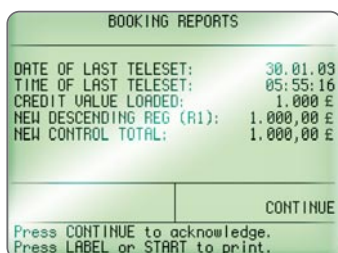

ultimail can be configured to handle mail volumes ranging from 30 to 500 letters per day.

A modular design enables you to configure your **ultimail** according to your individual needs. Choose from two basic models – **ultimail 60** (60 letters/minute) or **ultimail 120** (120 letters/minute) – and then select from a variety of options to build the system you need.

Anything is possible, if you are looking for uncompromising efficiency and ease of operation.

PUT YOUR MESSAGE ON YOUR ENVELOPE

Use your outgoing mail to advertise for you. The **ultimail** can store up to six advertising images or messages that you design – and select as needed. But there's even more: Edit and add a text message at any time. Compose your message on the keyboard to give your customers and clients up-to-date information about holidays, trade fairs or special offers. An easy, no-cost method of spreading the word.

ANYTHING IS POSSIBLE

ultimail 60 + 120 franking machines

 **Letter feeder**

An automatic feeder separates and seals same-sized envelopes from a stack.

 **Sealer**

A sealer spares you from moistening and closing the letter flaps.

ORDERING CONSUMABLES

To order, call the following phone number:

PHONE ORDERING LINE 0123 456 789

CONTINUE

Press CONTINUE to proceed.

 **Updates: Online**

New services or postage rate changes introduced by your postal service are automatically downloaded whenever you load new postage. Never again will you need to replace postage rate memory components in your machine.

✉ Label dispenser

Indispensable for thick letters and small packages. Enter the number of labels needed, and let ultimail print and eject adhesive labels with postage.

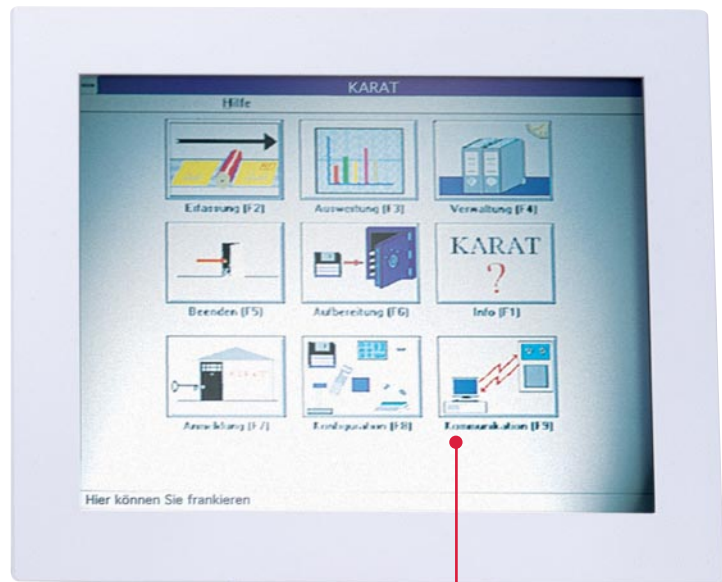

✉ Supplementary interface

A second, supplementary interface enables you to connect the ultimail to a separate electronic letter scale or a PC.

✉ Scale

A space-saving integrated 5-kilogram scale precisely weighs every letter, automatically calculates the correct postage, and sets the franking machine accordingly.

Optionally available with a handy differential weighing function. Determines the correct postage for a single letter when it is lifted from a stack of letters on the weighing platform.

✉ Postage accounting software

KARAT:

For your professional cost account management KARAT lets you create as many accounts as you want and manages central database of department accounts, mail data and postage costs.

InfoPrint:

Conveniently formats and prints department account information. Can also be used to create delivery lists for special mailing services.

✉ Card security

A master-card enables the machine's administrator to activate all ultimail functions. Optional user-cards can be assigned to specific accounts. This enables you to share the ultimail with partners or distribute postage to different department budgets. Chipcards can also be used to load new advertising slogans.
